

General Risk Disclosure

This notice provides you with information about the risks associated with investment products, in which you may invest, through services provided to you by Stay Relentless Ltd.

Products offered by Stay Relentless Ltd. include education, automated trading software and cryptocurrencies, in which you gain a percentage ownership of the underlying asset. In addition, Stay Relentless offers trade ideas for differences (CFDs) that offer exposure to currencies, commodities and indices.

Since Cryptocurrency markets are decentralised and non-regulated, our Cryptocurrencies Trading Services as such are not governed by any specific European regulatory framework. Therefore, when Stay Relentless Ltd. customers use our Cryptocurrencies Trading Service, they will not benefit from any protections and will not be able to use the UK Financial Ombudsman Service for dispute resolution.

All of these products carry a high degree of risk and are not suitable for many investors. This notice provides you with information about the risks associated with these products, but it cannot explain all of the risks nor how such risks relate to your personal circumstances. If you are in doubt, you should seek professional advice. It is important that you fully understand the risks involved before deciding to engage with Stay Relentless Ltd, that you have adequate financial resources to bear such risks and that you monitor your positions carefully. Trading involves risk to your capital. You should not invest money that you cannot afford to lose, however, you cannot lose more than your initial investment.

CFDs

CFD stands for "Contract For Difference," meaning you are not buying the underlying asset, but, rather, purchasing a contract to settle the difference in the initial and ending price of the asset. When trading CFDs, you generally trade on margin, which means you only have to deposit a small percentage of the overall value of your position. This is known as "Leverage", and even small market movements may have great impact, negative or positive, on your trading account.

CFDs are complex instruments and come with a high risk of losing money rapidly due to leverage. 67% of retail investor accounts lose money when trading CFDs with this provider. You should consider whether you understand how CFDs work, and whether you can afford to take the high risk of losing your money.

CFDs are not suited to the long-term investor. If you hold a CFD open over a long period of time, the associated costs increase (such as overnight fees), and it may be more beneficial for you to buy the underlying asset instead. Sudden market movements, known as "gapping" may occur, causing a dramatic shift in the price of an underlying asset. Gapping may occur when the underlying market is closed, meaning the price on the underlying market may open at a significantly different level, and at a less advantageous price for you.

Cryptocurrencies

Trading risks

Since Cryptocurrency markets are decentralised and non-regulated, our Cryptocurrencies Trading Services (Nodes) are unregulated services which are not governed by any specific European regulatory framework (including MIFID). This means that there is no central bank that can take corrective measures to protect the value of Cryptocurrencies in a crisis or issue more currency.

We will endeavour to enable you to benefit from rules relating to best execution and safekeeping of client assets.

CRYPTOCURRENCY MARKETS ARE DETERMINED BY DEMAND AND SUPPLY ONLY.

The Cryptocurrency market is a dynamic arena and its respective prices are often highly unpredictable and volatile. The Cryptocurrency prices are usually not transparent, highly speculative and susceptible to market manipulation. In the worst-case scenario, the product could be rendered worthless.

Cryptocurrency trading is prone to being misused for illegal activities due to the anonymity of transactions and investors would be adversely affected if law enforcement agencies were to investigate any alleged illicit activities.

ACCORDINGLY, CRYPTOCURRENCIES SHOULD BE SEEN AS AN EXTREMELY HIGH-RISK ASSET AND YOU SHOULD NEVER INVEST FUNDS THAT YOU CANNOT AFFORD TO LOSE.

Given the foregoing, Cryptocurrencies are not appropriate for all investors. You should not deal in these products unless you have the necessary knowledge and expertise, understand these products' characteristics and your exposure to risk. You should also be satisfied that

the product is suitable for you in light of your circumstances and financial position. In addition, use of our Services can never be considered a safe investment, rather, only an investment with a high risk of loss inherently associated with them.

The risk of loss in trading Cryptocurrencies can be substantial. You should, therefore, carefully consider whether such trading is suitable for you in light of your circumstances and financial resources. You should be aware that you may sustain a total loss of the funds in your account.
